

Joaquín González

Full-Stack Developer

Santiago, Chile · +56 9 8537 2509 · joan.gonmir@gmail.com · waxopez.github.io · github.com/Waxopez · linkedin.com/in/joaquin-gonzalez-3836a5425

PROFILE

Full-stack developer with **two products running in production**. At Geodatos, a geophysical exploration consultancy with over 40 years in the market, I joined as an intern, **was hired afterwards**, and built both the corporate website and the internal intranet end to end: **Java / Spring Boot, PostgreSQL, React 19, Docker** and production deployment on Linux. Focused on maintainable code, REST APIs, security and infrastructure. On my own I work in **Python** (scrapers and automation) and trained and evaluated my own machine learning model. Graduated in Software Development (Duoc UC). Advanced English. **Available to start immediately.**

EXPERIENCE

Servicios Geológicos Geodatos SAIC

Santiago, Chile · Jan 2026 – Jul 2026

Software Developer

Mar 2026 – Jul 2026

- Designed and built the **corporate intranet end to end (269 Java files, 7 modules): Spring Boot 3.5 (Java 17) + PostgreSQL 16** backend and **React 19** (Vite, Tailwind, React Query) frontend.
- Implemented **REST APIs**, authentication and **role-based access control (RBAC)** with Spring Security, plus modules for projects, HR, document management, email notifications and administration.
- Modeled the database with **54 versioned Flyway migrations** and deployed to **production** on a **Linux** server at DigitalOcean with **Docker**, including domain, **DNS** (NIC Chile) and HTTPS.

Web Development (professional internship)

Jan 2026 – Mar 2026

- Designed, built and deployed the **corporate website (geodatos.cl): React 19 + Vite** frontend (React Router, Tailwind, SEO) and a **PHP 8.2 backend** (Composer, PHPMailer).
- Containerized the app with **Docker** (Caddy + PHP-FPM) and applied **security hardening**: input validation, CSRF, rate limiting and antivirus (ClamAV) on uploads.

PROJECTS

- EventOut — capstone project (team of 3, developer):** REST API in **Spring Boot (Java 21) + MySQL** with **JWT** and role-based access, **React 19** SPA (MVVM, Leaflet map) and a **Kotlin/Compose** Android app. Deployed on **AWS EC2 with Docker Compose** (multi-stage builds, nginx) with 26 automated tests.
- Competitive LoL draft engine — personal project, in real use:** **Python** scraper plus a **regularised logistic regression** model in TypeScript that predicts which draft wins, with *walk-forward* temporal validation and leakage controls. Evaluated on a 97-series holdout: exact-move accuracy went from **6.7% to 15.0%** over the previous version (log-loss, Brier, calibration).
- Job search tool (github.com/Waxopez/getonboard-scraper):** **Python** tool that consumes a paginated **REST API**, normalises the data, ranks openings by skill match and exports to CSV. Standard library only, with a built-in self-check.

SKILLS

Languages: Java, Python, JavaScript, TypeScript, PHP, Kotlin, SQL

Backend: Spring Boot, Spring Security (JWT, RBAC), REST APIs, Hibernate/JPA, Swagger/OpenAPI

Databases: PostgreSQL, MySQL, Oracle SQL / PL-SQL, data modelling, Flyway migrations

Frontend: React, HTML5/CSS, Tailwind, Vite, React Query, Bootstrap

DevOps / Infra: Docker and Docker Compose, Linux (server administration), DigitalOcean, AWS EC2, nginx, DNS and HTTPS, production deployment

Testing: JUnit 5, Mockito, Vitest, Testing Library, Playwright, unit and integration testing

Practices & tools: Git/GitHub (branching, pull requests, code review), Scrum, Jira, Pandas, Kotlin/Android, AI-assisted development

EDUCATION

Software Development (Analista Programador) — Duoc UC

2024 – 2026 · Graduated July 2026

Final grade 6.3 / 7.0.

Computer Science Engineering — Universidad Autónoma

2021 – 2023 · partial

CERTIFICATIONS & LANGUAGES

Full-Stack Programming Certification — Duoc UC · 2026

CAIPC — Artificial Intelligence Professional Certification · 2025

CSFPC — Cyber Security Foundation Certification · 2025

Python Essentials 1 — Cisco Networking Academy · 2024

Languages: Spanish (native) · English (advanced)
